92 Series MAConnect™ with Sub D

- **Maximum of 20 solenoids can be powered by a single multi-pin connector.**

- **Up to 40 solenoids can be powered by means of a second multi-pin connector station.**

- **Left or right end connector adapters available.**

- **Maximum allowable coil amperage is 250 milliamps.**

- **Standard AC and DC voltage options available up to 240 volts.**

- **Current connection types available are:**
  - 9, 15, and 25 pin Sub-D connectors.
  - 10, 16, 20, and 26 pin ribbon type connectors.
  - 24 pin AMP CPC connector.

- **Wash-down Sub-D connectors available (9, 15 and 25 pin) - designed to meet NEMA4 and IP65 ratings.**

- **Grounding of the stations and adapter is standard for 30 volt coils and above, optional for 30 volts and lower.**

- **Dielectric strength to ground in excess of 2000 volts.**
92 Series MACconnect™ with SM32

- Maximum of 16 solenoids possible (24VDC with a maximum of 6.0 watts per solenoid).
- Maximum of 4 inputs available with PNP or NPN capability.
- 16 inputs available with a tethered input module.
- All outputs are protected by self-resetting fuses. This protects the electronics in the event of a short and enables the node to remain active.
- Left or right end SM32 adapters available.
- Flexibility to support remotely located stacks.
- Designed to meet NEMA 4 and IP65 ratings - washdown (except Allen Bradley Remote I/O).
- Multiple protocols available (DeviceNet, Allen Bradley Remote I/O, Profibus)
92 Series MAConnect™ with SM16

- Maximum of 16 solenoids possible (24VDC with a maximum of 6.0 watts per solenoid).
- Left or right end SM16 adapters available.
- Flexibility to support remotely located stacks.
- Designed to meet NEMA 4 and IP65 ratings - washdown.
- Available with common through ports (i.e. inlet, exhaust and ext. pilot ports).
- DeviceNet compatible.
92 Series MAConnect™ with Tethered Inputs

- 16 inputs.
- Field convertible for either positive or negative logic.
- Inputs are divided into four groups of four. Each group is field convertible for either PNP or NPN.
- Washdown model available - designed to meet NEMA 4 and IP65 ratings.
92 Series MAConnect™ Remote Manifolds

- Easy hookup.
- Remote stacks are compatible with Sub D and ribbon style connectors, SM32 and SM16 serial modules.
- Primary and remote stacks can operate 20 solenoids in any configuration with Sub D connectors.
- Primary and remote stacks can operate 16 solenoids in any configuration with SM32 or SM16 serial modules.
Specifications
92 Series Valve

Fluids:
Compressed Air or Inert Gases

Lubrication:
Not required. If used, select a medium aniline point lubricant (between 180°F and 210°F)

Safe Operating Temperature Range:
0°F to 120°F (-18°C to 50°C)

Pressure Range:
20 to 120 PSI (Internal Pilot)
Vacuum to 120 PSI (External Pilot)
35 to 120 PSI (3 Position, Internal/External Pilot)

Electrical:
AC 120/60 Inrush current 7.6 Volt-amps (.063 amps)
Holding Current 4.8 Volt-amps (.04 amps)
Maximum Coil Amperage - 250mA
Maximum Voltage - 240VAC
Dielectric Strength in Excess of 2000 Volts.
Recommended Mating Sub D Cable Specifications
3 Amp Current Rating per Conductor
300 Volt RMS, 105°C Insulation

Amp CPC Connector Specifications

Receptacle: (Mounted in MAConnect™ adapter block)

• Series 1 Amp CPC Connector
• Shell size 23
• 24 Male pins (1.57mm diameter)
• Five key configuration

Recommended Plug

• Amp part number 206837-1
• 5 key configuration
• Recommended receptacle contacts are size 16 type III+ (Accepts pin dia. 1.57mm)

Additional information can be obtained from Amp Catalog 82021
Specifications
SM16 Manifold

Outputs:
   Number: 16 Channels / Solenoids on manifold
   Voltage Current: 24 VDC at .225 per channel (6.0 Watts max.)

Inputs: Not available at this time

Protocols:
   DeviceNet

Current Consumption:
   Outputs - 4 A Max.
   Electronics - 200mA

Voltage Ranges:
   Operating with single supply: 24VDC
   Operating separate supply for valves: 24VDC

Safe Operating Temperature Range:
   0-50° C (32-120°F)
   10-90% RH (Non-condensing)

Operating Atmosphere:
   No corrosive gases

Enclosure:
   Designed to meet NEMA 4 and IP65

Installation and Service Precautions:
A. Do not install or service MAC valves without first making sure both air and electrical power to the machine are off and that all air has been completely bled from the system.

B. MAC valves should only be installed and/or serviced by qualified knowledgable personnel who understand how the specific valve is to be pneumatically piped and electrically connected (where applicable). Flow paths through the valve are shown in the catalog and on the valve by use of ANSI or ISO type standard and graphic symbols. Do not install unless these symbols and the valve functions and operations are thoroughly understood.

C. Before service, maintenance, repair or cleaning, consult local distributor or factory for Parts and Operation Sheet and information on proper cleaning and lubrication agents. Do not subject MAC valves' parts to any foreign substance including lubricants and cleaning agents not specifically recommended by MAC Valves, Inc.

D. MAC valves are never to be stepped on while working on a machine. Damage to the valve, or lines to the valve (either air or electrical lines) or accidental activating of a manual operator on the valve could result in a dangerous condition.

Warning:
Under no circumstances are MAC valves to be used in any application where failure of the valve to operate as intended could jeopardize the safety of the operator or any other person.
- Do not operate outside of the pressure range listed on valve label or outside of designated temperature range.
- Air supply must be clean. Contamination of valve can affect proper operation.
- Before attempting to repair, adjust or clean valve, consult catalog, parts and operation sheet, or factory for proper maintenance procedures, lubrication, and cleaning agents. Never attempt to repair or perform other maintenance with air pressure to valve.
- If airline lubrication is used, consult catalog, parts and operation sheet, or factory for recommended lubricants.
