REACH

To Whom It May Concern:

According to the European Registration, Evaluation and Authorization of Chemicals (REACH) regulation - MAC Valves qualifies as an Article Supplier. Since MAC’s products do not “intentionally release” chemicals or preparations, MAC is not bound by Article 7(1) of REACH regulation, regarding chemical registration. MAC has conducted an investigation in compliance with Article 33 regarding Substances of Very High Concern (SVHC) and restrictive substances. To the best of our knowledge according to our independent analysis any trace amounts of the before mentioned substances utilized in the manufacturing of MAC product are below the registration/reporting limits, as stated in the regulation. Such compliance releases MAC from the need to report to the European Chemicals Agency per Article 7(4).

Joseph C. Richardson
Vice President of Sales
MAC VALVES, Inc.
