REACH COMPLIANCE DECLARATION

MAC Valves, Inc. (“MAC”) is a global manufacturing leader in pneumatic and fluid valves, proportional valves, flow controls, regulators and related products associated with industrial automation and fluid power controlled devices. MAC qualifies as an Article Supplier. MAC is, therefore, considered a “downstream user” for purposes of REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) documentation.

MAC bases our best material content knowledge on information provided by third parties and our suppliers.

MAC certifies that products we manufacture do not contain the substances within 197 entries currently on the Substance of Very High Concern (SVHC) in concentrations above 0.1% (w/w) as listed by the European Chemicals Agency (ECHA) under the provisions of Regulation (EC) No. 1907/2006 of the European Parliament and of the council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) per the ECHA’s SVHC V20 candidate list (ECHA/PR/19/01) published on January 15th, 2019 and previous updates.

MAC is not obligated to register with the European Agency for Chemicals as the products manufactured by MAC are non-chemical products and, under normal and reasonable use, will not release harmful substances. MAC does not manufacture “substances” or “preparations” and expected use of its products will not cause the “intentional release of substances”. MAC is, therefore, not bound by Article 7(1) of REACH regulation, regarding chemical registration.

Such compliance releases MAC from the need to report to the European Chemicals Agency per Article 7(4).

A handwritten signature in black ink, appearing to read "JCR", with a long horizontal flourish extending to the right.

Joseph C. Richardson
Vice President of Sales
MAC VALVES, Inc.
